The CVL Network [The Network] is a series of events presented by the Center for Vital Longevity’s early career scientists, with content focused on topics of interest to emerging business and community leaders. It is an opportunity to hear more about CVL’s exciting work, and network with others interested in learning more about the next generation of cutting edge cognitive health related scientific discoveries.

Events will be held several times each year and are open to all DRC members.

2019–2020 Featured Speakers

**Director’s Research Circle Open House**
Kendra Seaman, PhD
“Motivation and Decision Making in the Aging Brain”
October 16, 2019

**The CVL Network**
Chris Foster, PhD & Christina Webb, PhD
“Brain Myths De-bunked”
November 20, 2019

**Biennial Science Symposium Visiting Speaker**

The **Director’s Research Circle** (DRC) is an exclusive membership program that brings together like-minded community members who share an interest in learning more about the ways we can all enjoy cognitive vitality throughout our lives and prevent the devastating consequences of age-related cognitive diseases such as Alzheimer’s disease and other forms of dementia.

The program includes interactive talks, hands-on demonstrations and opportunities to interact with the Center for Vital Longevity’s (CVL) internationally recognized scientists; as well as speakers from around the country, who will present their latest findings and research vital to our long-term cognitive health.

As a member, your participation will fuel important research supporting our efforts to understand how the brain changes as we grow older, how to maximize cognitive health, and what interventions can prevent or slow a decline in memory.
