

THE DALLAS Aging & Cognition CONFERENCE

SUPPORT THE DACC!

The Dallas Aging and Cognition (DACC) will bring over 200 neuroscientists to Dallas, from all over the world, to share their latest discoveries and new perspectives in the cognitive neuroscience of aging. The conference will cover topics such as *The Healthy Brain in Transition to Disease and The Social and Emotional Underpinnings of Neurocognitive Aging*.

We invite you to be a part of bringing these brilliant minds to Dallas. Your participation will fuel important research and support our goal to allow as many people as possible to enjoy cognitive vitality – and not suffer the devastating consequences associated with drastic cognitive decline – through the entirety of their lives.

SPONSOR A YOUNG SCIENTIST:

Support a young scientist by donating to our travel awards fund. Your contribution of \$500 will allow a student or trainee to attend the conference and advance their scientific career.
